

## How To Remove Black Mould From The Mattress

A mould free and odourless mattress is very important, mattress plays an important part in our life. We spent 40% of our day sleeping on our favourite mattress, and it stays very close to our body and skin.

## Here Are Some Tips For Black Mould Removal

Here is the list of tips and tricks for black mould removal, follow it for mattress cleaning.

## Vacuum Clean The Mattress

Vacuuming is a very important part of cleaning any furniture item. It stays always a primary step for **mattress cleaning** because it sucks all the dirt, dust and debris which sits deeply on the mattress.

# Mattress Cleaning Using Alcohol

Alcohol is a very effective ingredient for black mould removal, you just need to add equal parts of rubbing alcohol and warm water in a bucket.

# Expose The Mattress In The Sunlight

## Step Two: Air

Allow your mattress to **air** outside in the sun (if that's not possible, try a well-ventilated sunny room).

The sun helps to kill bacteria and dry moisture build-up.

Using sunlight for black mould removal is a natural way to deal with the mould. Spread the mattress in bright sunlight, the rays coming from sunlight would kill all the bacterias along with mould.
